

EMOTIONS

- ✚ **The objective of this online activity was to identify emotions and assimilate new notions in English.**
- ✚ **The students associated the basic emotions and the mimic-gestural image appropriated to each one of them. The presentation was in Romanian and the basic emotions were translated into English. Students watched a presentation clip of the movie "Inside Out".**
- ✚ **After watching the film, students correctly identified the emotions.**
- ✚ **They correlated properly the situations that triggered the emotions.**
- ✚ **All of them pronounced and understood the new words in English representing the five basic emotions: sadness, joy, fear, disgust and anger.**
- ✚ **Impact:**
This example of good practice has been successfully implemented in this target group of 12 students, will be used by the teachers of our school in personal development and counseling classes and can be followed and continued by other teachers in the country and abroad.
